

My MR Injector.

Saves Time

From the way the syringes are installed to the way in which patient and injection data is made available to be utilized, the MEDRAD® MRXperion syringes and automated documentation* solution have been designed to save you time.
This is efficient.

Increases Confidence

Reduce manual work and potential errors with automated documentation*, while improving the accuracy and consistency of recorded protocols and associated data. MEDRAD® MRXperion gives you the confidence that you are acting on accurate information.
This is smart.

Enhances Patient Care

The combination of all the innovative features of MEDRAD® MRXperion means one thing allowing you to provide the best care possible for your patient.
This is MEDRAD® MRXperion.

* Available as an option.

Specifications

Components	Dimensions
Control room unit	15.12 (38.4 cm) W
	10.76 (27.33 cm) H
	7.94 (20.17 cm) D
Scan room unit	23.30 (59.0 cm) W
	71.40 (181.0 cm) H
	23.30 (59.0 cm) D
Power supply	7.60 (19.0 cm) W
	3.40 (9.0 cm) H
	15.40 (39.0 cm) D

Electrical	
Voltage requirements	100 240 VAC (50/60 Hz) 120 210 VA
Electrical leakage	Unit <100 microamperes Patient <100 microamperes Earth <500 microamperes

System capabilities	
Syringe capacities	Syringe A: 65 mL Syringe B: 115 mL
Programmable volume range (mL)	Syringe A: 0.5 mL to max syringe volume in: 0.1 mL increments from 0.5 mL to 31 mL 1 mL increments above 31 mL Syringe B: 1 mL to max syringe volume in 1 mL increments
Programmable flow range (mL/sec)	0.01 to 10 mL/s in: 0.01 mL/s increments between 0.01 and 3.1 mL/s 0.1 mL/s increments between 3.1 and 10 mL/s
KVO (keep vein open)	6 factory presets of 0.25 mL every 15, 20, 30, 45, 60 or 75 sec
Test inject	Configurable from 0.5 mL to 20 mL in 0.1 mL increments
Pressure range (psi)	6 factory presets from 100 to 325 PSI or, 690 to 2240 kPa
Injection/post injection reminders	Up to 5 settings of 1 sec to 20 minutes in 1 sec increments
Injection protocol storage	60 protocols up to 6 phases each

System capabilities)	
Injection hold/pause	Up to 20 minutes in 1 sec increments
eGFR calculator	For adults: MDRD, Cockcroft-Gault, Modified Cockcroft-Gault and CKD-EPI methods For children: Bedside Schwartz method
Informatics connectivity capability	Yes, with optional Radimetrics Enterprise Platform*
Remote service capability	Yes, with optional VirtualCare Remote Support*
Mounting	Floor pedestal includes integrated IV pole

Accessories	
IV Pole	Choice of single hook or double hook IV pole
Prefilled syringe adaptor	Choice of 4 different adaptors
Mobile clamp kit	Available for mobile MRI scanners

Ordering Information	
Injector system	Catalog # MRXP 200: MEDRAD® MRXperion MR Injection System

Disposable syringe kit	
Dual syringe kit	Catalog # XP 65/115 VS: Coes: 65 mL Qwik-Fit syringe for contrast media 115 mL Qwik-Fit syringe for saline One large spike for saline One small spike for contrast media 96 low pressure connector tube with T-connector and check valve

Single syringe kit	Catalog # XP 115 VS Coes: 115 mL Qwik-Fit syringe for saline One large spike for saline 96 low pressure connector tube with T-connector or and check valve
--------------------	--

* Radimetrics Enterprise Platform and VirtualCare Remote Support are options that can be ordered. They are not included as part of the base product.

Efficient. Smart. My MR Injector.

Clear Direction. ➤ From Diagnosis to Care.

MEDRAD® MRXperion
MR Injection System

Efficient. Smart.

The MEDRAD® MRXperion MR injection system has been designed to support your staff in providing efficient and accurate care.

My MR Workflow.

Standard

The new MEDRAD® MRXperion syringes with patented "snap & go" syringe design and the automated features simplify the preparation of the injector. It's easy to use and saves time.

On board eGFR and weight-based dosing calculators provide important information that you may use to improve patient safety through individualized protocols via an intuitive, user friendly interface.

The test injection and KVO (keep vein open) function, together with injection pressure graphs, facilitate the high-quality performance of MEDRAD® MRXperion.

MR injection protocols can be stored for future reference ensuring consistent and repeatable results.

Optimized*

Improve the quality of the contrast media information capture via the barcode reader.

Take the full patient data into account when planning the examination by using the modality worklist.

Automatically generate a secondary capture, including injection and patient data and send it to PACS.

Automatically populate contrast and injection details in dictation system.

My Innovation in MR.

Optimize your workflow with automated documentation* and create new dimensions in digital healthcare.

Benefit from improved quality of your data

- > Pull up patient data from the modality worklist
- > Provide the right injection protocol for each patient
- > Automatically capture contrast media information with the barcode reader

Access data where you need it

- > Easily add all important injection and patient data to the patient's DICOM records
- > Simplify your reporting process, while eliminating potential manual errors

Understand and analyze contrast usage

- > Perform statistical analysis
- > Centralize protocol management

Maximize uptime with VirtualCare™*

- > With the inclusion of a VirtualCare™ remote support system, alerts are monitored and resolved proactively
